

ÉTOILE-LED OR CRYSTAL-LED WITH CABLE

IP44 |  |  | 100-250V~/5V= Maxi 20-100W/power supply | Dimming (option) : 100kΩ, 0-10V, PWM 10V | 0-45°C | CE, CB, UL, cUL

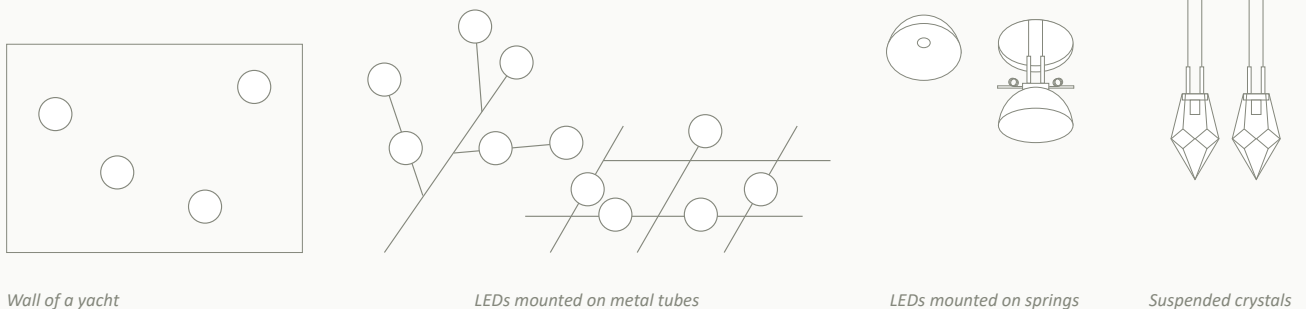

For intensive usage (furniture, yacht) we recommend using LEDs with cable instead of pinning them in composite conductive plates (that are described in other technical sheets).

Our LEDs with cable are perfectly adapted to these cases.

The technical sheet "Ceiling-Wall, Etoile, Crystal, Nature Harmonieuse" presents the characteristics of LEDs, Crystals, and power supply.

Examples

Wall of a yacht

LEDs mounted on metal tubes

LEDs mounted on springs

Suspended crystals
