

Star Sower: illuminating life

Semeur d'Étoiles designs and manufactures artistic lighting for elegant interiors: sculptures, chandeliers, luminous walls or ceilings. Their signature is the gentleness of a French art of living, with a contemporary approach based on people. Its creator, **Ludovic Clément d'Armon**, continues a family tradition of several centuries. A heritage of gentleman glassmakers, painters, cabinetmakers, and stonemasons. This artist creates new lights, mixing creative emotions and optical, electronic, thermal, ecological, electrical, chemical, chromatic, energetic, mechanical and medical reflections. All creations are lit exclusively by high quality LEDs. Simultaneously, he works with light theoretically and experimentally so that it resonates with these materials, textures and shapes. Semeur d'Étoiles relies on its mastery of technical complexity to offer original and technical objects. Available tailor-made, from €9,000. semeurdetoiles.fr
